

Somerton House Surgery Policy: Providing medical reports for sporting events

Somerton House Surgery are keen to support our patients in entering sporting events. Many events now require a doctor to provide a 'fitness to participate' certificate eg Paris Marathon. Where your GP feels that they have adequate expertise to assess your fitness to participate in an event then we will book you in for assessment and provide our own medical report. This may not be the original form provided by the sporting event but in our experience this report is likely to be accepted.

Please be aware that this service is not covered by the NHS services and is a service which is provided on a private basis and there will be a fee.

Example:

Paris Marathon: 15minute HCA appointment for ECG
10 minute GP appointment to review notes / examine cardiovascular system and provide report
Fee: £50
Please note: if further investigation is required the fee as stated above may increase.
